

AMENDED IN SENATE JUNE 18, 2013

AMENDED IN ASSEMBLY APRIL 30, 2013

AMENDED IN ASSEMBLY MARCH 21, 2013

CALIFORNIA LEGISLATURE—2013–14 REGULAR SESSION

ASSEMBLY BILL

No. 727

Introduced by Assembly Member Stone

February 21, 2013

An act to add Section 6707 to the Public Resources Code, relating to public trust lands.

LEGISLATIVE COUNSEL'S DIGEST

AB 727, as amended, Stone. Public trust lands: dredging: notice and leases.

Existing law authorizes the State Lands Commission to enter into an exchange, with any person or private entity, of filled or reclaimed tidelands and submerged lands or beds of navigable waterways, or interests in those lands, if the commission finds that specified conditions are met.

This bill would require that a local trustee of tide and submerged lands or an applicant for dredging on granted tide and submerged lands that intends to commence dredging on granted public trust lands, upon which any right to minerals on those lands is reserved by the state, to notify the commission, in writing, no later than 120 days prior to the time dredging is commenced, and would require that the written notice contain specified information.

The bill would specify that if that written notice is provided to the commission, a local trustee or applicant for dredging *may presume that a dredging lease* is not required to enter into a lease for the dredging if

prescribed conditions are met. The bill would authorize the commission, if any dredging on granted tide and submerged lands wherein minerals are reserved to the state does not meet those prescribed conditions, to require a lease from the commission for that dredging. The bill would require the commission, if it determines that a lease is required, to provide the grantee or applicant for dredging with written notification of that determination within 30 days after the commission receives notification of the proposed dredging. The bill would require that any revenue that is earned by a local trustee from the dredging of granted lands be held or spent in a manner consistent with the trustee's existing obligations under the public trust and the specific terms of its grant of lands. The bill would make the above requirements applicable only to dredging operations that are commenced on or after January 1, 2014.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. It is the intent of the Legislature to streamline
2 the process of dredging on granted tide and submerged lands
3 wherein mineral deposits are reserved to the state when consistent
4 with the preservation and promotion of tideland trust activities,
5 and to preserve tideland trust revenue within the corpus of the
6 trust. To this end, it is also the intent of the Legislature that
7 dredging on granted tide and submerged lands wherein mineral
8 deposits are reserved to the state does not require a dredging lease
9 from the State Lands Commission when the dredging is conducted
10 strictly for the purposes of maintaining or enhancing maritime or
11 water-dependent commerce, navigation, fishing, or other public
12 trust activities required under the granting statute.

13 SEC. 2. The Legislature finds and declares all of the following:

14 (a) As part of its fiduciary duty, a local trustee of granted tide
15 and submerged lands is required to take reasonable steps under
16 the circumstances to take and keep control of, and preserve property
17 for, public trust purposes on behalf of the state for the benefit of
18 all the people of California.

19 (b) All local trustees of tide and submerged lands that were
20 granted for the establishment, improvement, or conduct of a harbor
21 and for the construction, maintenance, and operation of the public
22 trust lands in a manner that is necessary or convenient for the

1 promotion and accommodation of commerce and navigation
2 should, from time to time, deepen and maintain depths of their
3 berths, harbors, and navigable waterways within their grants to
4 further the trust purposes for which the local trustee holds tide and
5 submerged lands.

6 (c) Dredging activity on granted tide and submerged lands
7 typically requires multiple approvals and permits from various
8 local, state, and federal regulators, and must comply with the
9 environmental requirements prescribed under the California
10 Environmental Quality Act (Division 13 (commencing with Section
11 21000) of the Public Resources Code).

12 (d) When the rights to mineral deposits are reserved to the state
13 in any grant of tide and submerged lands, the state should reserve
14 the right to require that any dredging on those granted lands be
15 carried out pursuant to a lease entered into by a local trustee and
16 the State Lands Commission.

17 SEC. 3. Section 6707 is added to the Public Resources Code,
18 to read:

19 6707. (a) The Legislature finds and declares that to promote
20 and accommodate public trust uses, including commerce,
21 navigation, and fisheries, proper management of granted public
22 trust lands may require the local trustee to conduct dredging of
23 navigational channels and vessel berths on granted lands, including
24 on those granted lands in which the state reserves mineral interests,
25 and that those dredging activities are consistent with the public
26 trust.

27 (b) A local trustee of tide and submerged lands or an applicant
28 for dredging on granted tide and submerged lands that intends to
29 commence dredging on granted public trust lands, upon which any
30 right to minerals on those lands is reserved by the state, shall notify
31 the commission, in writing, no later than 120 days prior to the time
32 dredging is commenced.

33 The notice shall contain all of the following information:

34 (1) A description of the dredging to be conducted on those lands,
35 including a map and land description showing the area and project
36 site.

37 (2) A description of the amount of material to be dredged,
38 disposal amount, location, and means of disposal, if available.

39 (3) The time and manner in which dredging is to occur.

1 (4) The relevant permits, authorizations, and approvals that exist
2 or must be obtained to complete dredging, or, if applicable,
3 demonstration of compliance with a dredged materials management
4 office plan that is administered by the United States Army Corps
5 of Engineers.

6 (5) A declaration that the dredging is necessary for the proper
7 management of the grant consistent with the public trust for
8 commerce, navigation, and fisheries, or a statement of why the
9 dredging is necessary to be undertaken for other purposes and a
10 declaration that the dredging is consistent with the statutory grant.

11 (6) A statement with supporting documents that explains whether
12 the trustee anticipates receipt of any revenues from the materials
13 to be dredged, and, if so, in what amounts.

14 (c) After submission of the written notice required by this
15 section, a local trustee or applicant for dredging *may presume that*
16 *a dredging lease* is not required ~~to enter into a lease for the~~
17 ~~dredging~~ if all of the following conditions are met:

18 (1) The dredging is maintenance dredging consistent with the
19 proper management of the granted lands.

20 (2) The dredged material is not sold or used for a private benefit.

21 (3) The dredged material is disposed of at an approved onshore
22 or offshore disposal site.

23 (d) The commission may require a lease for any dredging on
24 granted tide and submerged lands wherein the right to minerals is
25 reserved to the state if the proposed dredging does not meet the
26 conditions set forth in subdivision (c). The commission may
27 delegate the authority to determine whether a lease is necessary
28 to its executive officer. If the commission determines that a lease
29 is required, the commission shall provide the grantee or applicant
30 for dredging with written notification of that determination within
31 30 days after the commission receives notification of the proposed
32 dredging. All applicable reimbursement costs shall be submitted
33 with the application for a lease, if a lease is necessary.

34 (e) This section shall apply only to dredging operations that are
35 commenced on or after January 1, 2014.

36 (f) This section does not exempt a local trustee of tide and
37 submerged lands or other person or entity dredging on those lands
38 from any permit or other approval necessary to carry out dredging
39 operations that may be required by another local, state, or federal
40 law.

1 (g) (1) Any revenue that is earned by a local trustee from the
2 dredging of granted lands shall be held or spent in a manner
3 consistent with the trustee's existing obligations under the public
4 trust and the specific terms of its grant of lands.

5 (2) If a local trustee receives any revenue from the dredged
6 materials not otherwise disclosed in the notice required by this
7 section, the local trustee shall immediately notify the commission
8 in writing. The commission may require the grantee to pay a
9 reasonable royalty and enter into a lease for the dredging. If a
10 grantee fails to notify the commission, the commission may require
11 the local trustee to remit all revenues to the state.

12 (h) Nothing in this section shall be construed to limit the
13 authority of the commission to enter into a lease, at its discretion,
14 for dredging activity on granted tide and submerged lands wherein
15 the right to minerals is reserved to the state.
